HOW WE MAY USE AND DISCLOSE MEDICAL INFORMATION ABOUT YOU

The following categories describe different ways that we use and disclose medical information. For each category of uses or disclosures, we will explain what we mean and give some examples. Not every use or disclosure in a category will be listed. However, all of the ways we are permitted to use and disclose information will fall within one of the categories.

USE OR DISCLOSURE THAT CAN BE MADE WITHOUT YOUR AUTHORIZATION OR AN OPPORTUNITY FOR YOU TO OBJECT

1. For Treatment. We may use medical information about you to provide you with medical treatment or services. We may disclose medical information about you to doctors, nurses, technicians, medical students, or other personnel who are involved in taking care of you. The organizations listed in this notice may share medical information about you in order to coordinate the different things you need, such as prescriptions.
2. For Payment. We may use and disclose medical information about you so that the treatment and services you receive at an organization listed in this notice may be billed to and payment may be collected from you, an insurance company or a third party. For example, we may need to give your health plan information about surgery you received so your health plan will pay us or reimburse you for the surgery. We may also tell your health plan about a treatment you are going to receive to obtain prior approval or to determine whether your plan will cover the treatment. We may also share information about you and any insurance information with other health care providers to assist them in getting payment for a service they have provided you. For example, we can share this information with a laboratory service that evaluates a laboratory specimen.
3. For Health Care Operations. We may use and disclose medical information about you for operation of the organizations listed in this notice. These uses and disclosures are necessary to run the organizations and to make sure that all of our patients receive quality care. For example, we may use medical information to review our treatment and services and to evaluate the performance of our staff in caring for you. We may also combine medical information about many patients to decide what additional services we should offer, what services are not needed, and whether certain new treatments are effective. We may also disclose information to doctors, nurses, technicians, medical students, and other organization personnel for review and learning purposes. We may also combine the medical information we have with medical information from other organizations to compare how we are doing and see where we can make improvements in the care and services we offer. We may use your medical information to send questionnaires to you about your experience so that we can identify ways to improve your satisfaction with the services we provide. We may remove information that identifies you from this set of medical information so others may use it to study health care and health care delivery without learning who the specific patients are. We may also produce limited data sets that are partially de-identified and that must be used under restrictive agreements for purposes of research, public health, and other healthcare operations described above. We may disclose your medical information to other health providers who also have a relationship with you for activities related to evaluating the quality of care, for coordinating your care, evaluating the competence of healthcare providers, conducting training, or for fraud or abuse investigation.
